EASi Announces Distribution Agreement for LS-DYNA

EASi to distribute LS-DYNA in India

Bangalore, India – April 9, 2007 – EASi, a leading provider of engineering services in the automotive industry, announced it signed an agreement with Livermore Software Technology Corporation to distribute LS-DYNA in India. EASi will also provide training and technical support to users of LS-DYNA in India.

LS-DYNA is a general-purpose transient dynamic finite element program capable of simulating complex real world problems. It is optimized for shared and distributed memory Unix, Linux, and Windows based, platforms.

About EASi

Founded in 1981, EASi is headquartered in Madison Heights, Michigan, USA and is a tier-one engineering services supplier to over 15 OEMs and over 65 suppliers. Its contributions to technology, process, applications and material innovation in the industry have won recognition as a leading-edge engineering services company. EASi's longstanding service to the global automotive industry has helped establish its reputation as a solid, trustworthy, innovative and customer-focused company. EASi is an affiliate of the Allegis Group, Inc., a \$5 billion service company headquartered in Baltimore, Maryland.

EASi is a leader in providing high-value engineering solutions to the global automotive industry and is widely recognized for its contributions to crash and safety engineering. EASi provided research and development support to the United States Department of Transportation under a 10 year contract covering simulation support to the National Highway Transportation Services Administration (NHTSA) on Federal Motor Vehicle Safety Standards (FMVSS) and Regulations.

EASi's Domain Knowledge Institute has developed comprehensive automotive specific training materials to complement LS-DYNA training.

About Livermore Technology Software Corporation

Headquartered in Livermore, California, Livermore Software Technology Corporation (LSTC) develops LS-DYNA and a suite of related and supporting engineering software products.

LSTC was founded in 1987 by John O. Hallquist to commercialize as LS-DYNA the public domain code that originated as DYNA3D. DYNA3D was developed at the Lawrence Livermore National Laboratory, by LSTC's founder, John O. Hallquist.
