For Immediate Release

EASi partners with Visual Collaboration Technologies (VCollab)

Madison Heights, Michigan, USA – Jan 15th, 2009 – EASi is pleased to announce its global partnership with Visual Collaboration Technologies to promote and distribute their software products.

Visual Communication among distributed workforce is becoming critically important in improving productivity and quality. VCollab's solutions address these issues and provide a state of the art common Visual Collaboration platform for viewing 3D information, in particular CAD, CAM, and CAE data, for the manufacturing industry.

With VCollab, you can view and manipulate any CAx Files without the native application dynamic. Superior file compression technology allows easy sharing of important design and engineering information across dispersed product development

VCollab's solutions are designed to dramatically reduce the burden of communicating 3D data and eliminates the need for domain specific authoring tools; breaking down communication barriers.

Key benefits of VCollab include:

- Up to 98% compression ratio to allow sharing of results via internet, email.
- Inbuilt convertor for reading native CAE results files from LS-Dyna, ANSYS, Nastran and Abaqus
- Ability to overlay multiple results to enable quick comparisons and engineering decision making; Light format that can be embedded into Microsoft office documents for reporting and presentations
- Easy to use viewer that eliminates the need to learn the complex CAD and CAE tools

“VCollab addresses the collaborative needs for today’s global engineering models. The ability to visualize and share design, CAE and manufacturing information in one environment will make it very easy for engineers to make important design decisions right from their desktop.” explains Mr. Vasantha Sural, VP of Technology and Domain Knowledge Institute (DKI™) at EASi.

About EASi

Founded in 1981, EASi is a global engineering firm that services the North American, European, and Asian markets. We are a trusted global engineering partner to our customers. We enable our customers to realize the benefits of globalization using our global engineering expertise, best-in-class recruiting capabilities and knowledge management framework. For more information visit <http://www.easi.com> or send an email to info@easi.com.

About VCollab

Founded in 2000, Visual Collaboration Technologies, Inc www.vcollab.com is headquartered in Troy, Michigan. The company also has offices in Dallas, Texas, and Bangalore, India, as well as a worldwide distribution network for its software products. The company’s VCollab software is the first multidisciplinary platform for CAD, CAM and CAE visual collaboration.
